I'll go forward with my review. Have you done any ethics reviews yet. If not, I plan on doing the permanent panel members first. I haven't gotten an update since 3:30 pm and this makes me nervous.

Grant was not one of the ones I reached out to because you had apparently asked all the former ad hoc reviewers of their availability.

If I placed him in the ad hoc (middle column) on my chart, then that means he said yes and I probably thought we'd consider him (consider means place in serious contention but in some cases such candidates may not be on the final panel ... I'm still open to looking at all who make it to 'spring training' and then make final cut later).

Todd,

Need to confirm Grant for the chemicals for Dec meeting. His response was a long time ago just as most of the other ad hocs

Sharlene,

Sep 10-12 hots both of my class times, so despite it being shorter, I would actually participate less. Of the agents under consideration, I would be most interested in perchloroethylene and tetrachloroethylene.

Thanks,

Steve Grant

Hi Stephen,

I understand how much work these meeting take. The next meeting is in a few weeks – Sept 10-12, 2019.

I just found out that we are trying to gauge the available of potential ad hoc panel members for the week of November 4<sup>th</sup> along with the meeting currently scheduled for October 21-25, 2019.

Do you have a preference?

1. Sept 10-12, 2019 - 1-bromopropane
2. October 21-25, 2019 – 2 chemicals
3. Week of Nov 4<sup>th</sup> – 2 chemicals
4. Dec 2-6, 2019 – 2 chemicals

Thank you.

Best regards,  
Sharlene

Hi Sharlene,

Sorry about the delay in my response, but had to discuss my availability with my administration. As indicated on the attached form, I have no conflicts with reviewing any of the chemicals under consideration. However, since I teach during the day in the Fall semester, I will not be able to physically travel to any week-long meetings. I will also have to excuse myself for 1.5 hours on Tuesday and Thursday at 1:30 to teach a class (I also teach at night, so I will have to leave any session at 6 PM). Although I am equally available (see above) for all three sessions you are enquiring about, I should probably only commit myself to one of them.

Thanks,

Stephen Grant

This is a follow-up e-mail to the one I sent about 10 days ago. I've addressed this message to all current or prospective TSCA SACC ad hoc members, "bcc," to avoid inadvertent replies to all.

Greetings!

Thank you for your interest and participation on the TSCA SACC as ad hoc member.

The TSCA SACC has a very busy schedule in 2019 with meetings scheduled from June through December 2019. On December 19, 2016, EPA published a list of 10 chemical substances that are the subject of the Agency's initial chemical risk evaluations, as required by TSCA § 6(b)(2)(A). The docket numbers, problem formulations, scope documents and supplemental documents for the 10 chemical substances that EPA initiated the risk evaluation process for in December 2016 can be found here:

- [Pigment Violet 29](#) (TSCA SACC meeting, June 2019)
- [1,4 Dioxane](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [Cyclic Aliphatic Bromide Cluster \(HBCD\)](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [1-Bromopropane](#) TBD (tentative Sept 10-12, 2019)
- [Methylene Chloride](#) TBD
- [N-Methylpyrrolidone](#) TBD
- [Perchloroethylene](#) TBD
- [Trichloroethylene](#) TBD
- [Carbon Tetrachloride](#) - TBD
- [Asbestos](#) - TBD

Future meetings will focus on the Agency's draft risk evaluation for the remaining seven (7) chemicals: 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, trichloroethylene, carbon tetrachloride, and asbestos. For planning purposes, please respond to the four questions regarding "impartiality" with respect to 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, and trichloroethylene (see word file attached).

Please indicate your availability for the following dates September 10-12, 2019 (1-Bromopropane), October 21-25, 2019, and December 2-6, 2019.

A public announcement of the specific draft chemical risk evaluations for the September meeting will be published within the next 2 weeks; however, we need to make sure that there is a quorum of TSCA SACC members and adequate

representation of expertise (additional ad hoc members) to address the Agency's charge before the official announcement is published. Time is of the essence. Please contact me if you have questions or concerns.

Thank you.
